PROFILE

Motivated Computer Science undergraduate with strong academic performance and a deep interest in Artificial Intelligence, Machine Learning, and data-driven technologies. Actively develops practical solutions through hands-on projects in machine learning, deep learning, and full-stack development. Maintains an active GitHub portfolio showcasing technical implementations and continuous learning. Interested in applying computational techniques to real-world problems and contributing to research-oriented environments.

EDUCATION

B.Tech in Computer science Engineering, CMR college of Engineering and Technology

08/2024 – 08/2028 | Hyderabad, India

CGPA: 8.86 | Focus areas: Artificial Intelligence, Machine Learning, Data Science, DSA

Intermediate, Vijetha junior college

07/2022 – 05/2024 | Hyderabad, India

MPC | Percentage: 97

LANGUAGES

English | Telugu | Hindi

SKILLS

Programming Languages

Python, C, SQL, Java

Artificial Intelligence & Machine Learning

Machine Learning, Deep Learning, Model Training, Data Preprocessing, Data Analysis

Data Science & Visualization

NumPy, Pandas, Matplotlib, Seaborn

Data Analytics Tools

Power BI (Beginner), Tableau

Developer Tools

GitHub, Google Colab, Jupyter Notebook, VS Code

Computer Science Fundamentals

Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP)

AI Tools & Prompt Engineering

AI-assisted development, prompt engineering, AI productivity tools, model-assisted coding

Web Development

HTML, CSS

CERTIFICATES

Data Structures & Algorithms (DSA) – CodeChef

Completed roadmap covering arrays, recursion, sorting, graphs, trees, dynamic programming, and competitive programming.

Python Programming & Data Analysis – CodeChef

Worked with NumPy, Pandas, and Matplotlib for data processing, visualization, and analytical workflows

SQL for Data Analysis & Advanced SQL – CodeChef

Practiced SQL queries, joins, aggregations, case studies, and real-world data analysis scenarios.

Introduction to Modern AI & Data Science – Cisco Networking Academy (2026)

Covered AI fundamentals, machine learning concepts, and data-driven decision systems.

Data Analytics Job Simulation – Deloitte (Forage) – 2025

Power BI, Machine Learning & Data Science – Udemy

Built foundational knowledge in data visualization, ML concepts, and analytics tools.

GenAI Powered Data Analytics Job Simulation – Tata (Forage) – 2025

Cambridge English Qualification – B1 Level

PROJECTS

LAMINAR – AI Vision Monitoring System | Python | Computer Vision, Python | Computer Vision | Backend Systems | AI

01/2026 – Present

- Developed an AI-based vision monitoring system capable of managing multiple camera streams for automated analysis.
- Designed backend architecture to manage camera services, worker lifecycle management, and system health monitoring.
- Implemented frame ingestion and processing pipelines for real-time video data analysis.
- Built a modular and scalable system architecture integrating database synchronization and monitoring workflows.

Deep Learning Model Development | Python | Neural Networks | Google Colab

- Implemented deep learning models and neural network experiments using Python.
- Explored model training workflows, dataset preprocessing, and optimization techniques.
- Conducted experimentation and computational analysis using Google Colab.

Automatic Plant Watering System, Arduino | IoT

- Designed an automated irrigation system using Arduino sensors.
- Implemented soil moisture monitoring to trigger automatic watering.
- Improved water efficiency through real-time environmental monitoring.
